1. Welcome to Veritas Lab

Veritas Lab is a website that helps you work out whether a photo or a document can be trusted.

People send around a lot of media that has been edited, faked or generated by a computer. Veritas Lab gives you a tidy, organised place to collect that material, markup the parts that look wrong, and talk it through with your colleagues, all without ever changing the original file.

1.1 The idea in one picture

Everything in Veritas Lab is built around three simple ideas that stack on top of each other:

- **Case:** A folder for one investigation. It has a name, a description, the person who created it, and a status of Open or Closed.
- **Evidence:** A file you upload into a case - currently a PNG image or a PDF document. Each piece of evidence gets its own workspace.
- **Annotation:** A mark you place on a piece of evidence: a circle around a suspicious area, or a comment pinned to a spot on the document. Note: annotations are overlayed onto evidence and do not alter it in anyway.

1.2 Who the platform is for

Veritas Lab is used by investigators, journalists, insurance analysts and anyone who needs to check whether media is genuine. What you can do depends on the role your organisation has given your account.

- **USER:** The baseline account. Can sign in, browse the cases they have access to, read evidence and take part in case discussions.
- **INVESTIGATOR:** Everything a USER can do, plus create new cases, see the summary statistics on the dashboard, and upload evidence into a case.
- **ADMIN:** Everything an INVESTIGATOR can do, plus an extra Admin page for managing everyone's accounts and roles.

Note: The dashboard, sidebar and other pages may look or function differently depending on your user role

2. How you move through the app

1. Landing page: Read what the platform does, then choose Sign Up or Log In.
2. Create Account / Log In: Prove who you are. You end up on the Dashboard.
3. Dashboard: See all your cases. Search, filter, open one, or create a new one.
4. Case page: See the evidence inside that case, upload more, or switch to the Reviews tab to discuss it.
5. Workbench: Open one piece of evidence and mark it up with circles and notes. Save your work.
6. Back out again: Return to the case, then to the Dashboard, and pick up the next job.

Two extra pages sit outside this main path and can be reached at any time from the sidebar:

- Help - tutorials, guides and frequently asked questions, with a search box.
- Admin - user management. This link only appears if you are an administrator.

2.1 The sidebar - your permanent menu

Once you are signed in, a sidebar stays pinned to the left of every page. It contains:

- A collapse button that shrinks the sidebar down to icons only, giving you more room for your work. Click it again to expand.
- Dashboard - takes you to your list of cases.
- Admin - administrators only.
- Help - the help menu.
- Log Out at the very bottom, which ends your session and returns you to the login screen.

The item you are currently on is highlighted in green, so you always know where you are.

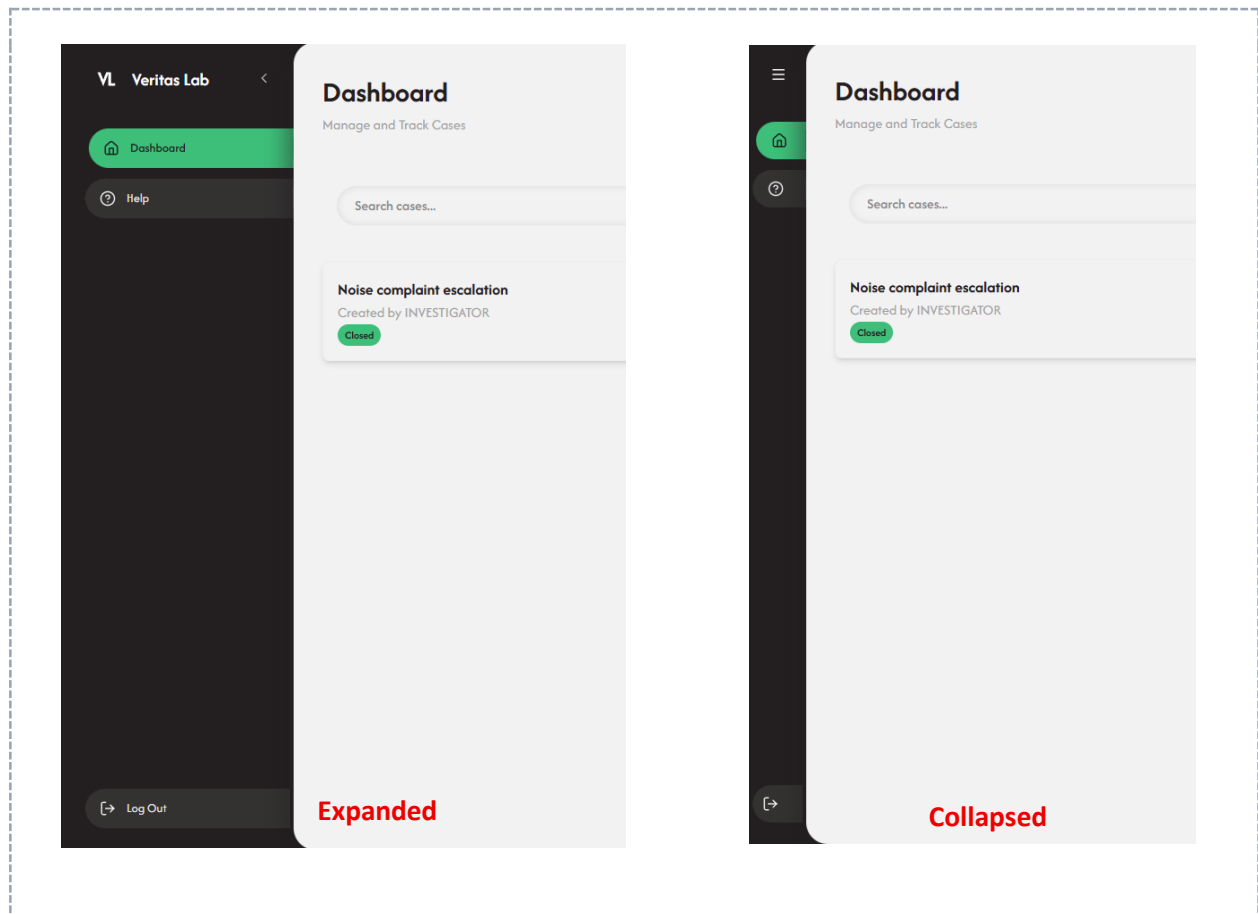

Figure 1 - The sidebar in its expanded and collapsed states

3. The Landing page

Address: /landing

3.1 What you see

An introduction to the site. Underneath there are two buttons:

- Sign Up - takes you to the account creation page.
- Log In - takes you to the sign-in page.

Scroll down and the page continues onto a white panel with three more sections:

- Highlighted Features - a short summary of what the platform can do, such as AI-powered analysis, tamper detection and deepfake detection.
- How It Works - the workflow explained in a few steps.
- Who It's For - the kinds of professionals the platform is built for.

A footer at the very bottom closes the page off.

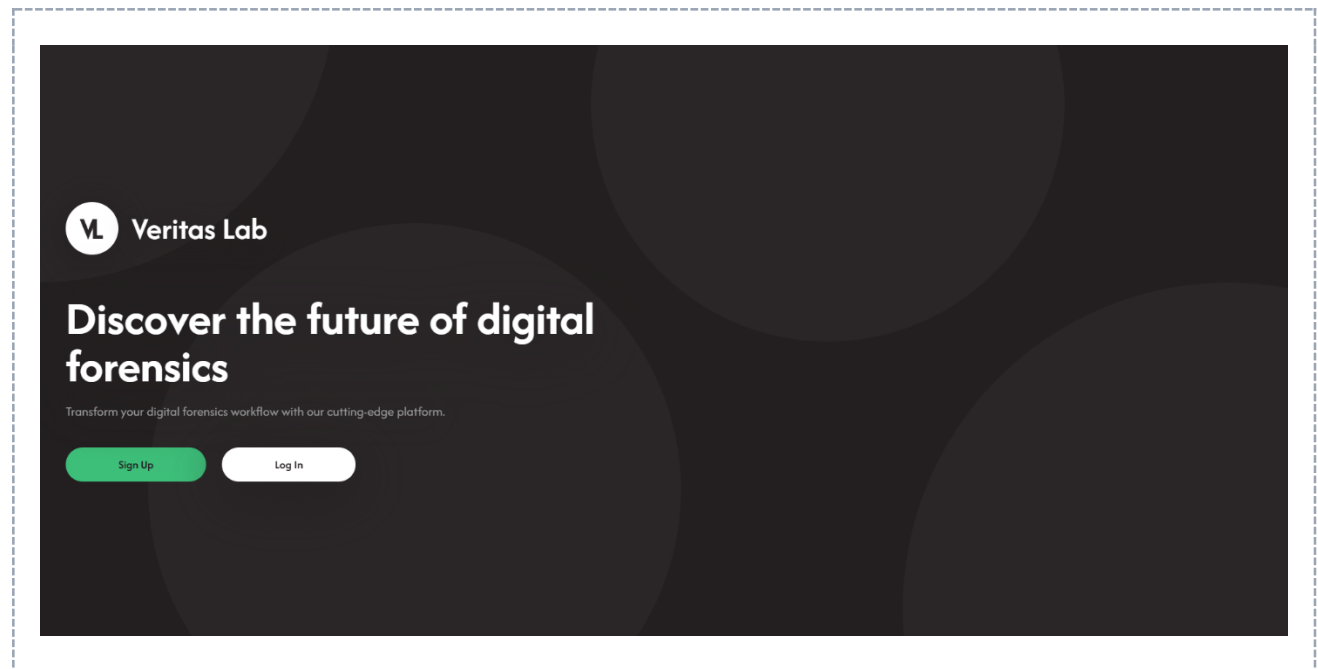

Figure 2 - The landing page, with the Sign Up and Log In buttons

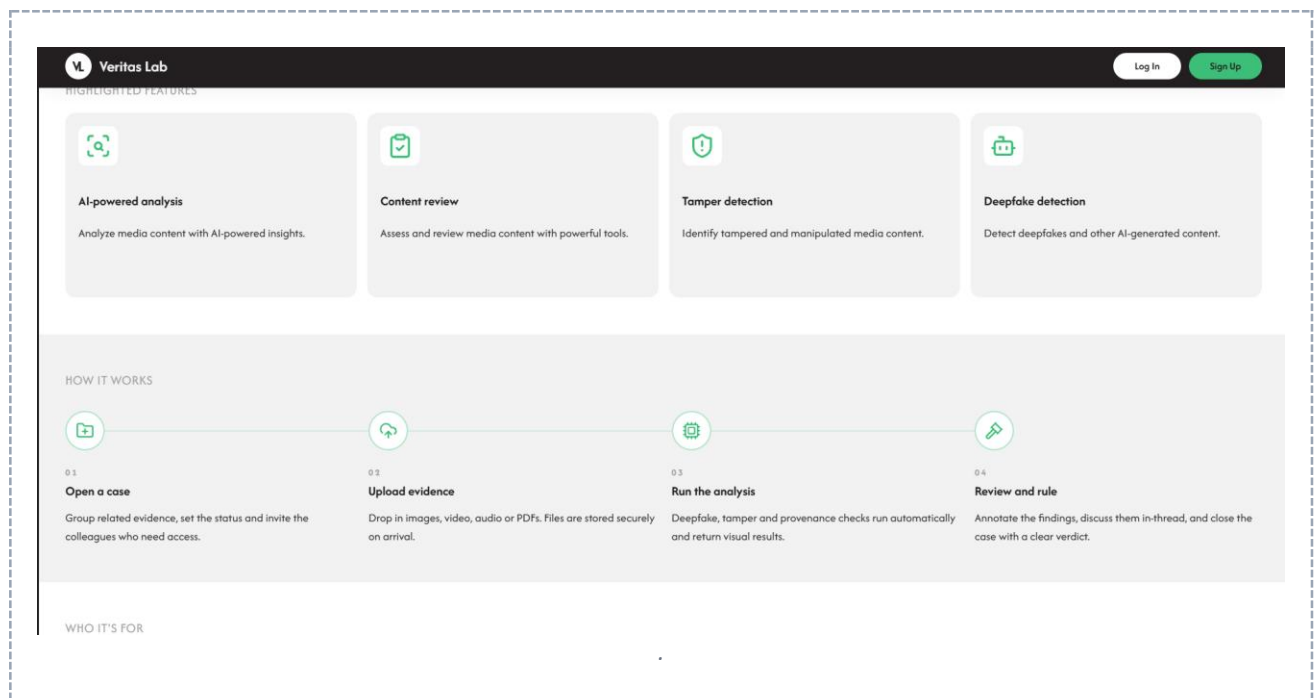

Figure 3 - The highlighted features and how it works sections further down the landing page

3.2 What to do here

1. If you have never used Veritas Lab, click Sign Up.
2. If you already have an account, click Log In.

4. Creating an account

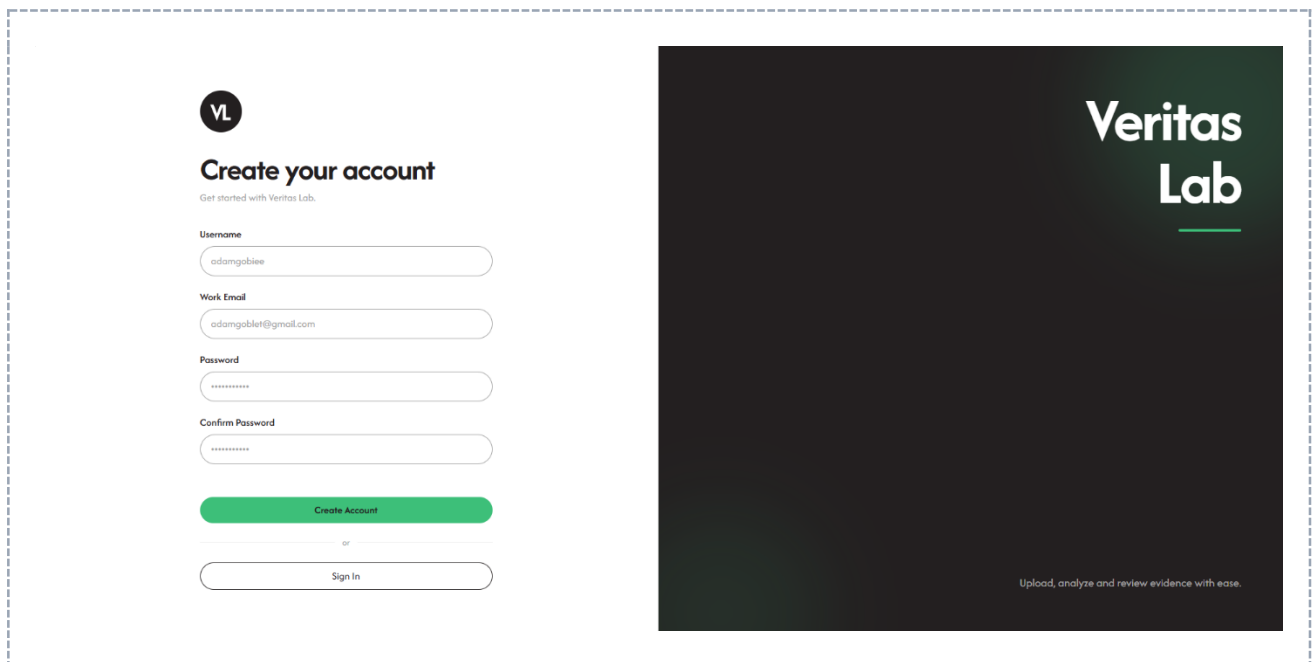

Address: /register

The screen is split in two. The left half of the screen holds the form on a narrow screen or a phone, only the form is visible.

4.1 Filling in the form

1. Fill in all four boxes.
2. Click Create Account.
3. If something is wrong, a red message appears above the button explaining what to fix.
4. If it worked, a green confirmation message appears, and you are taken onwards to sign in.

If you realise you already have an account, use the Sign In button instead.

The screenshot shows the 'Create your account' screen for Veritas Lab. The left side features a registration form with the following fields: Username (filled with 'adamgoblee'), Work Email (filled with 'adamgoblee@gmail.com'), Password (masked with dots), and Confirm Password (masked with dots). Below the form is a green 'Create Account' button and a 'Sign In' button. The right side is a dark green panel with the Veritas Lab logo and the tagline 'Upload, analyze and review evidence with ease.'

Figure 4 - The Create your account screen

The image shows a user interface for Veritas Lab. On the left, there is a 'Create your account' section with a Veritas Lab logo (VL) and the text 'Get started with Veritas Lab.' Below this are input fields for 'Username' (containing 'adangobiee'), 'Work Email' (containing 'adangoblet@gmail.com'), 'Password' (masked with dots), and 'Confirm Password' (masked with dots). A red warning box is displayed below the password fields, stating: 'Password must be atleast 12 characters, have an upper and lower case character and a special character'. Below the warning box is a green 'Create Account' button. Below the button is a horizontal line with the text 'or' in the center. Below the line is a 'Sign In' button. On the right, there is a dark green banner with the Veritas Lab logo and the text 'Upload, analyze and review evidence with ease.'

Figure 5 - The warning shown when something has been done incorrectly

5. Logging in

Address: /login

This screen looks like the registration screen - form on the left, navy panel on the right - but it only asks for two things.

1. Enter the email address you registered with.
2. Enter your password.
3. Click Login.
4. If the details are wrong, a red message appears explaining the problem. If they are right, you are taken to the Dashboard.

Do not have an account yet? Use the Create an account button below the divider.

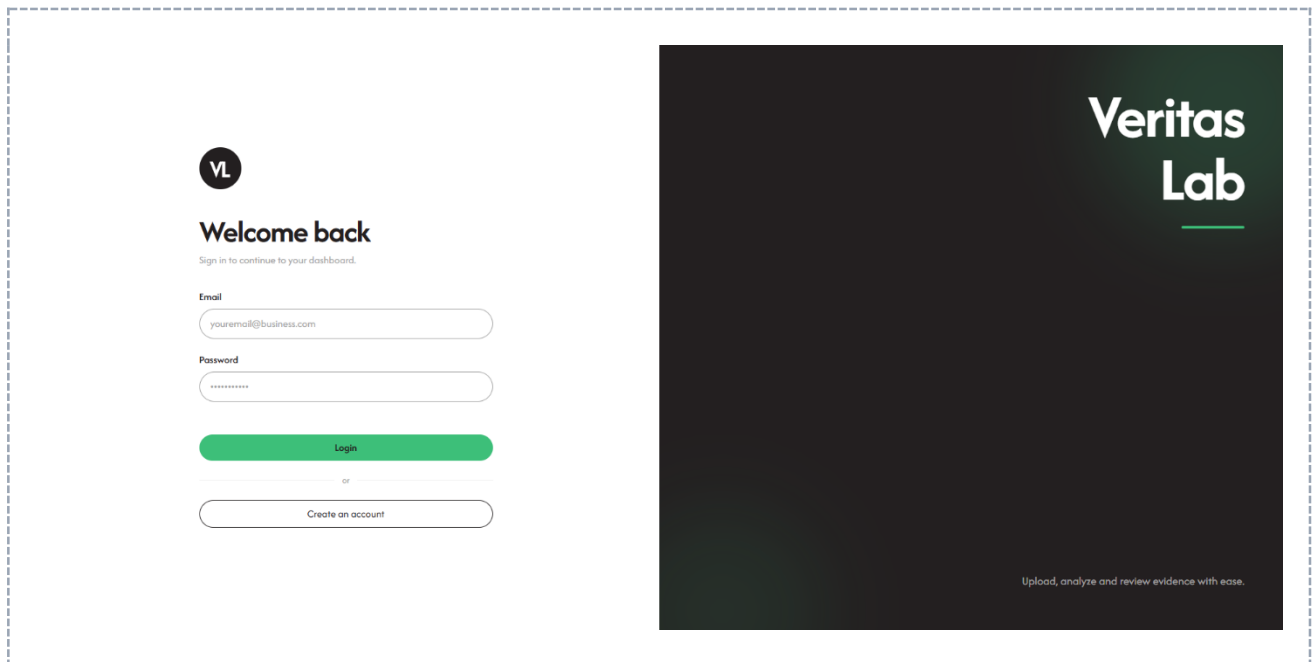

Figure 6 - The Welcome back login screen

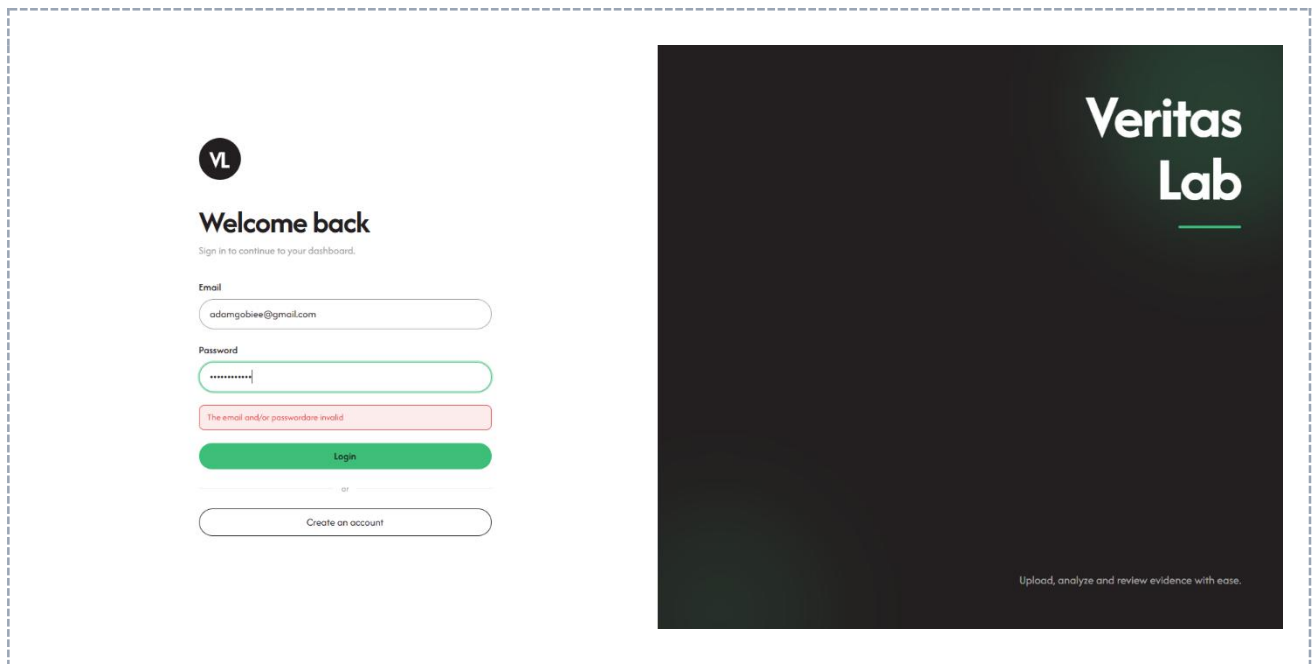

Figure 7 - The message shown when sign-in details are not accepted

6. The Dashboard

Address: /dashboard **Sidebar:** Dashboard

This is the main page and where you land after logging in.

6.1 The summary cards

Investigators and Admins see three cards across the top, each counting your cases:

- Total Cases - how many cases exist in total ("All time").
- Open Cases - how many are still being worked on.
- Cases Closed - how many have been finished.

These numbers update on their own as cases are created and closed. Standard USER accounts do not see these cards.

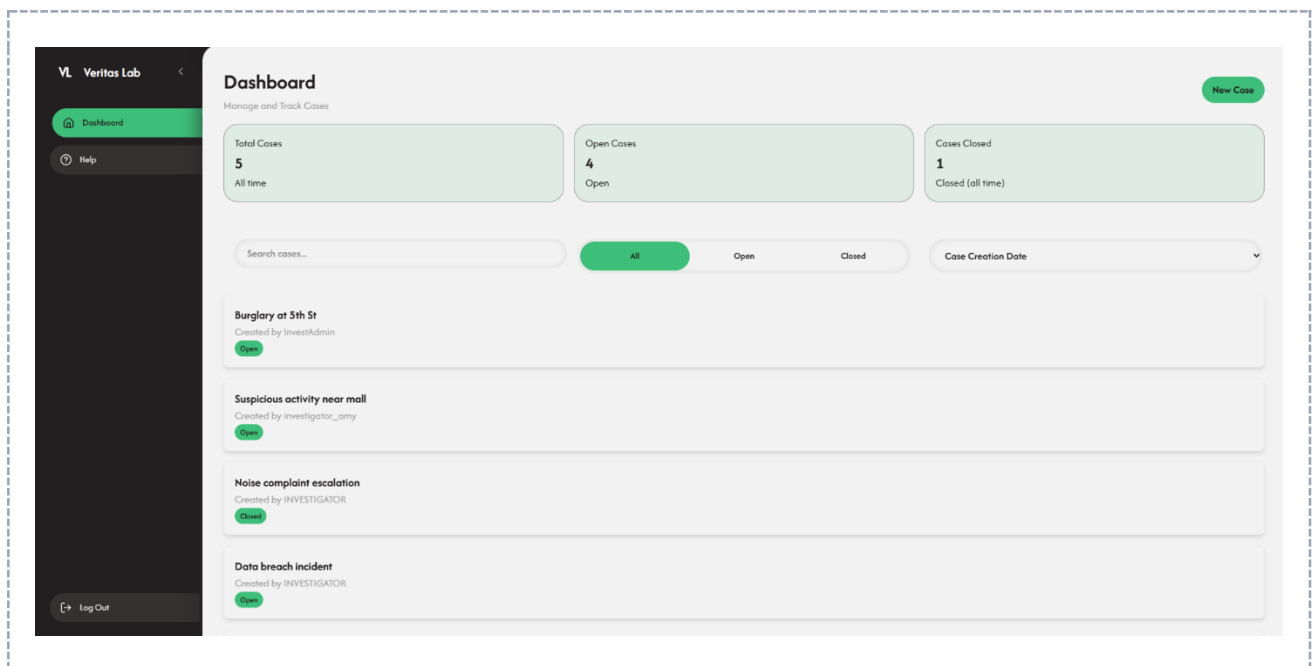

Figure 8 - The dashboard as an Investigator sees it

6.2 Finding a case

Below the cards is a row with three controls, left to right:

- Search cases: Type any part of a case name, the case ID, or the name of the person who created it. The list filters as you type.
- All / Open / Closed slider: Click one of the three segments to show only cases with that status. "All" shows everything.

- Sort dropdown: Choose the order of the list: Case Creation Date (newest first, the default), Case Name (A–Z), or Case Creator (A–Z).

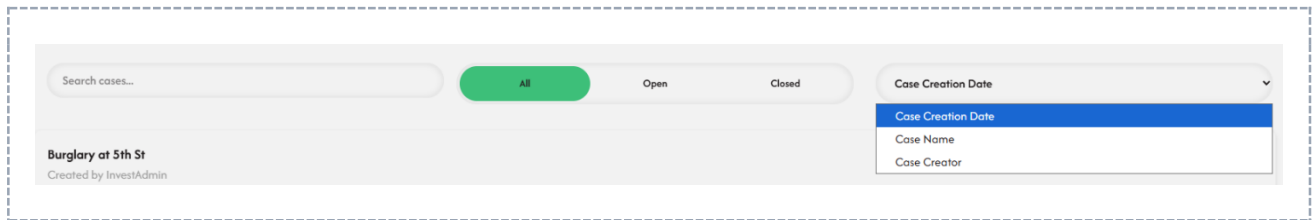

Figure 9 - The controls used to search, filter and sort your cases

6.3 The case list

Underneath, every case appears as a wide card showing its title, who created it, and a status of Open or Closed. Click anywhere on a card to open that case.

6.4 Creating a new case

Investigators and Admins have a green New Case button at the top right.

1. Click New Case. A dialog box titled "Create New Case" opens over the page.
2. Enter a Case Title - a short name such as "Claim 4471 - vehicle photos".
3. Enter a Case Description - a sentence or two explaining what is being investigated. Both fields are required.
4. Click Create Case. The button briefly reads "Creating..."
5. The dialog closes and your new case appears in the list straight away. If you change your mind at any point, click Cancel.

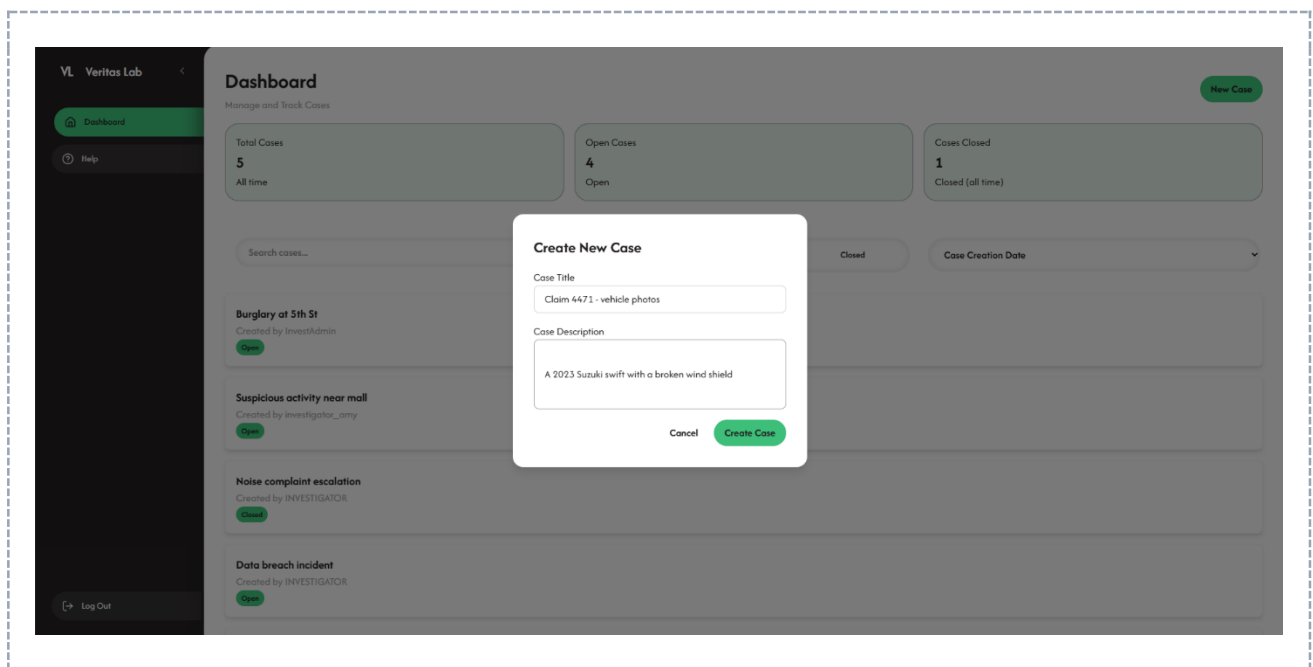

Figure 10 - Creating a new case

7. The Case page

Address: /case-page/<case id> **How to get here:** click any case card on the Dashboard

This page shows everything belonging to one investigation. The case name is the large heading, with its description underneath.

7.1 Case Details

A small panel on the right lists details about the case:

- Status - Open or Closed.
- Created - the date the case was opened, shown as day/month/year.

7.2 The two tabs

Under the heading is a slider with two options. Click either one to switch what is displayed below.

- Evidence: Every file uploaded to this case, shown as small preview cards. This is what you see when the page first opens.
- Reviews: A conversation thread where the investigators leave comments about the case.

7.3 The Evidence tab

Each piece of evidence appears as a card showing its file name, a small preview of the image or the first page of the PDF, and the file type. If a preview cannot be produced, the card simply says, "No preview".

Click a card to open that file in the Workbench, where you can mark it up.

If nothing has been uploaded yet, you will see "No evidence uploaded yet."

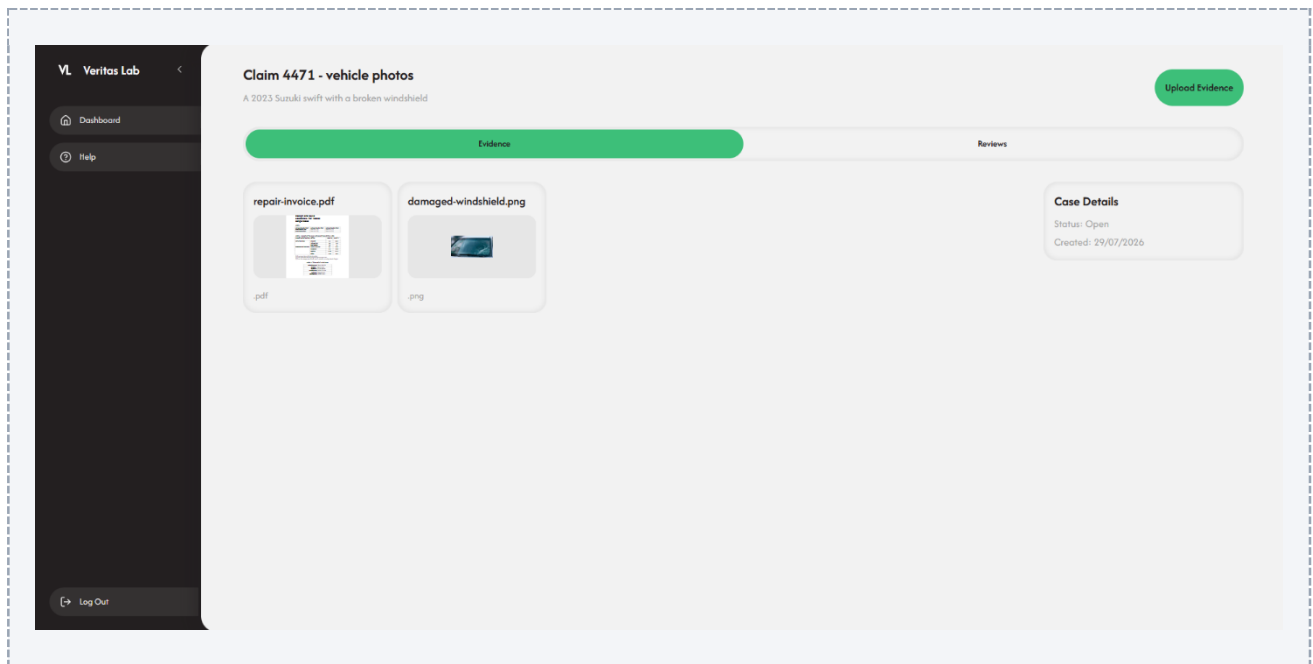

Figure 11 - A case page showing its uploaded evidence

7.4 Uploading evidence

Investigators see an Upload Evidence button at the top right of the case page.

1. Click Upload Evidence. A dialog titled "Upload Media" opens.
2. Click the large box in the middle - it reads "Click to browse" - and pick a file from your computer.
3. Once chosen, the box shows the name of your file so you can check it is the right one.
4. Click Upload Media. The dialog closes and the new item appears among the evidence cards.
5. Click Cancel if you change your mind.

Note: Only PNG images and PDF documents are supported now. Other formats will show as unsupported when you try to view them.

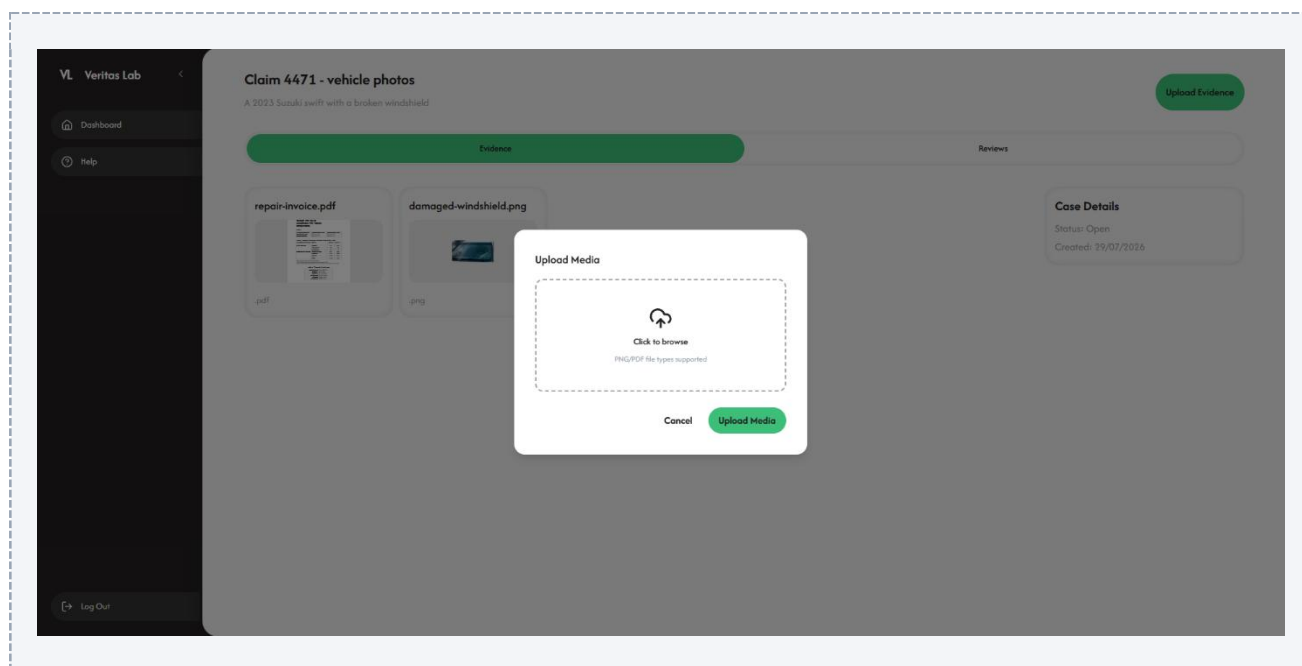

Figure 12 - Uploading a new piece of evidence

7.5 The Reviews tab

Reviews are where your investigators discuss the case. Click the Reviews segment of the slider to open it.

The panel shows the total number of comments in the corner, then the conversation itself. Your own comments are shown differently from other people's so the thread is easy to follow, and each one carries the author's username and the time it was posted.

To add a comment, type into the box at the bottom of the panel and submit it. If the case has no comments yet, the panel invites you to "Start the conversation below."

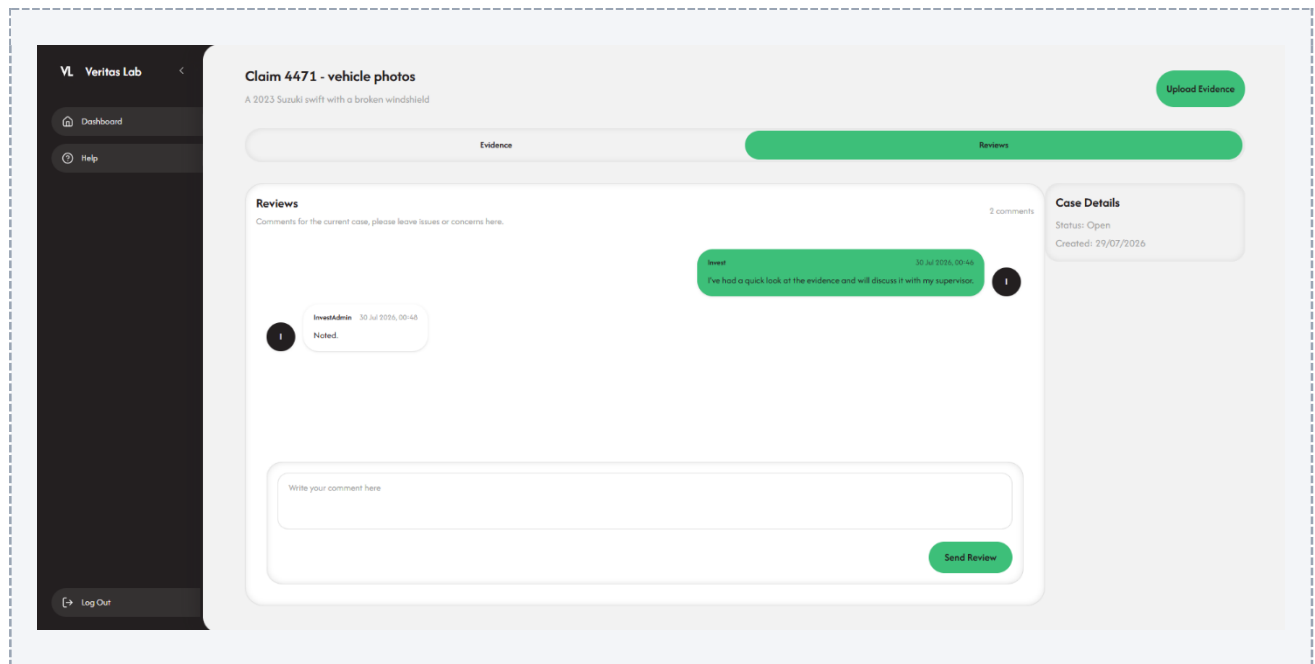

Figure 13 - The Reviews tab, where the team discusses a case

8. The Workbench

Address: /case-page/<case id>/workbench/<evidence id> **How to get here:** click an evidence card on a case page

The Workbench is where the detailed work happens. It shows one piece of evidence large on the left, with a Tools panel on the right.

At the very top there is a "Back to case" link with an arrow. Use it to return to the case you came from.

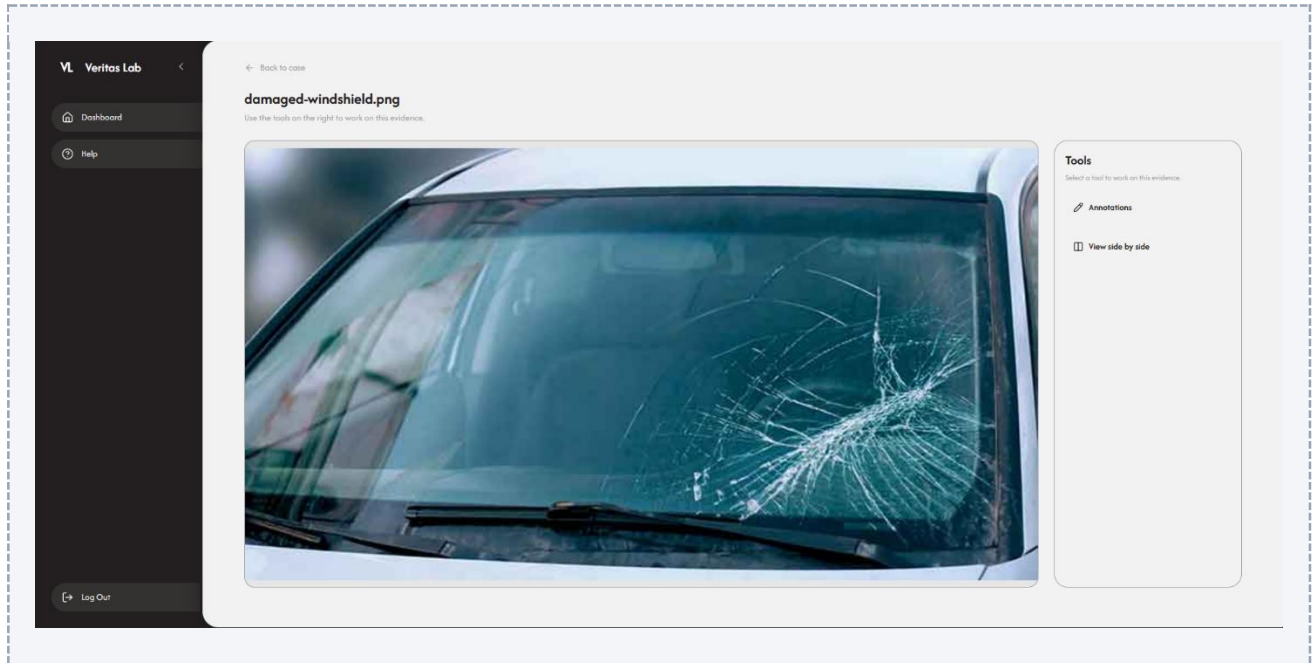

Figure 14 - The Workbench as it first opens

8.1 Turning on the annotation tools

The Tools panel starts closed - this keeps the view clean while you simply look at the file. Click Annotations (the pencil icon) to open the tools. It turns green to show it is switched on. Click it again to switch it off.

8.2 The three annotation tools

Once Annotations is on, a slider appears with three tools. Only one is active at a time, and a short hint under the media always tells you what the current tool does.

- **Select:** Click an annotation to view its details
- **Draw:** Click and drag to circle the area you want to flag.
- **Comment:** Click anywhere on the media to drop a note.

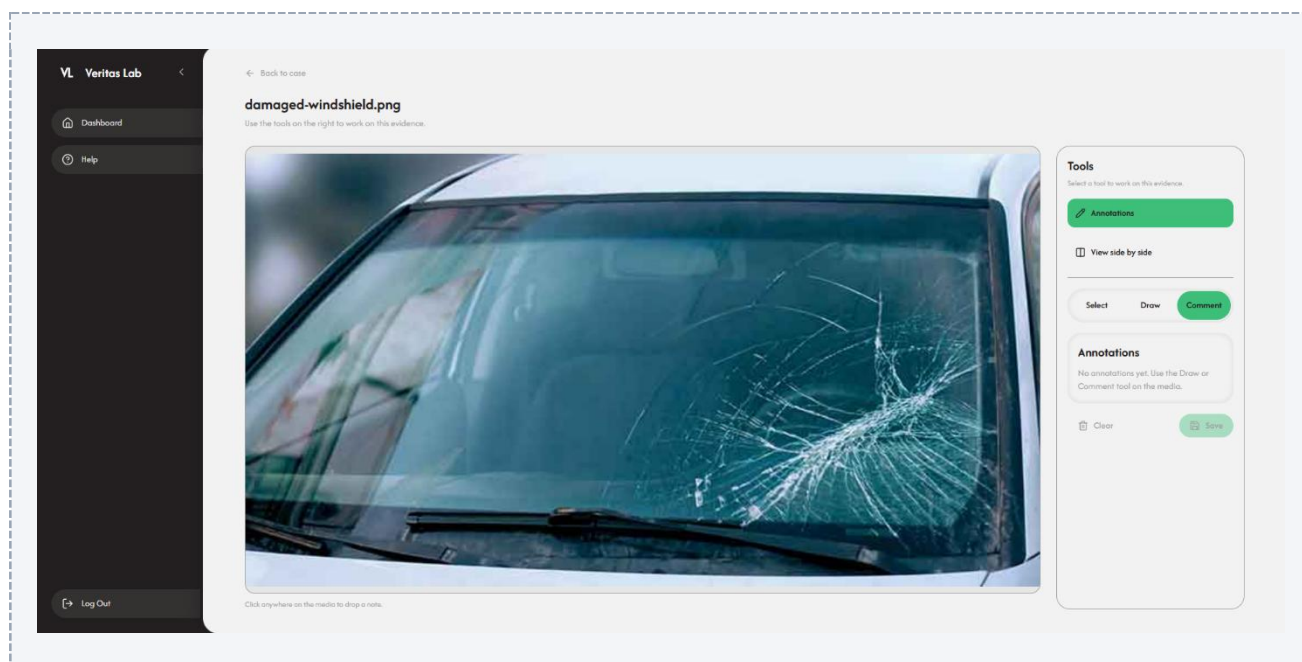

Figure 15 - The Tools panel with the annotation tools open

8.3 Marking up a file

1. Click Annotations to open the tools.
2. Choose Draw, then click and drag across the media to draw around the area you are flagging.
3. Choose Comment, then click a single point and type your note.
4. Every mark you make is added to the Annotations list in the panel. Drawn marks are listed as "Circled region 1", "Circled region 2" and so on; notes are listed using the text you typed.
5. Click an item in the list to highlight it on the media. Click the small bin icon next to an item to remove just that one.
6. When you are happy, click Save. If something goes wrong, you will see "Couldn't save. Try again."

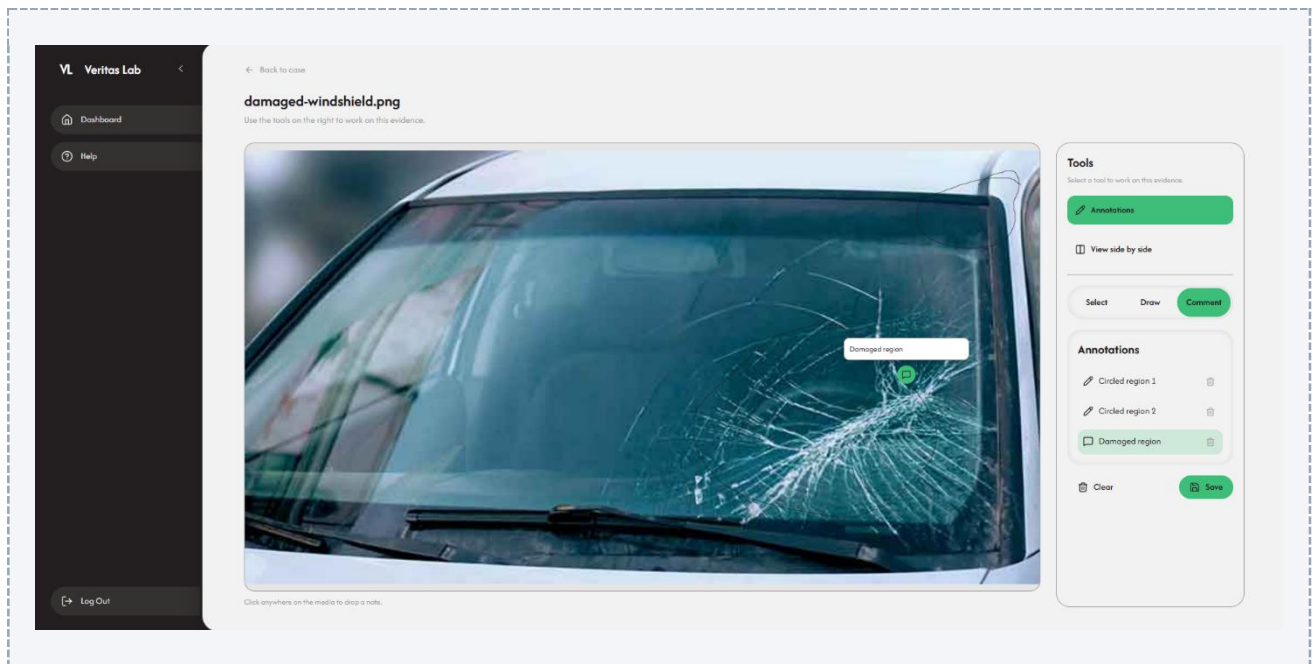

Figure 16 - An image marked up with circles and a pinned note

8.4 Two things worth knowing

- Your marks never change the original file. They live on a separate see-through layer above it, so the evidence stays forensically clean.
- Marks stay in the right place when you resize the window or use a different screen.
- For PDFs, each mark remembers which page it belongs to.
- If the file cannot be displayed, you will see a crossed-out image icon with "Preview not available for this file type" or "No media preview available yet".

9. The Admin page

Address: /admin **Sidebar:** Admin (administrators only)

This page is only for administrators. If your account is not an administrator, the Admin link does not appear in your sidebar, and typing the address directly will simply send you back to the Dashboard.

9.1 Finding a user

The top bar of the admin page allows you to:

- Search users - type a name to narrow the list down.
- Role filter - choose All, ADMIN, INVESTIGATOR or USER to show only accounts with that role.
- Sort dropdown - order the list by Username, User ID or Role.

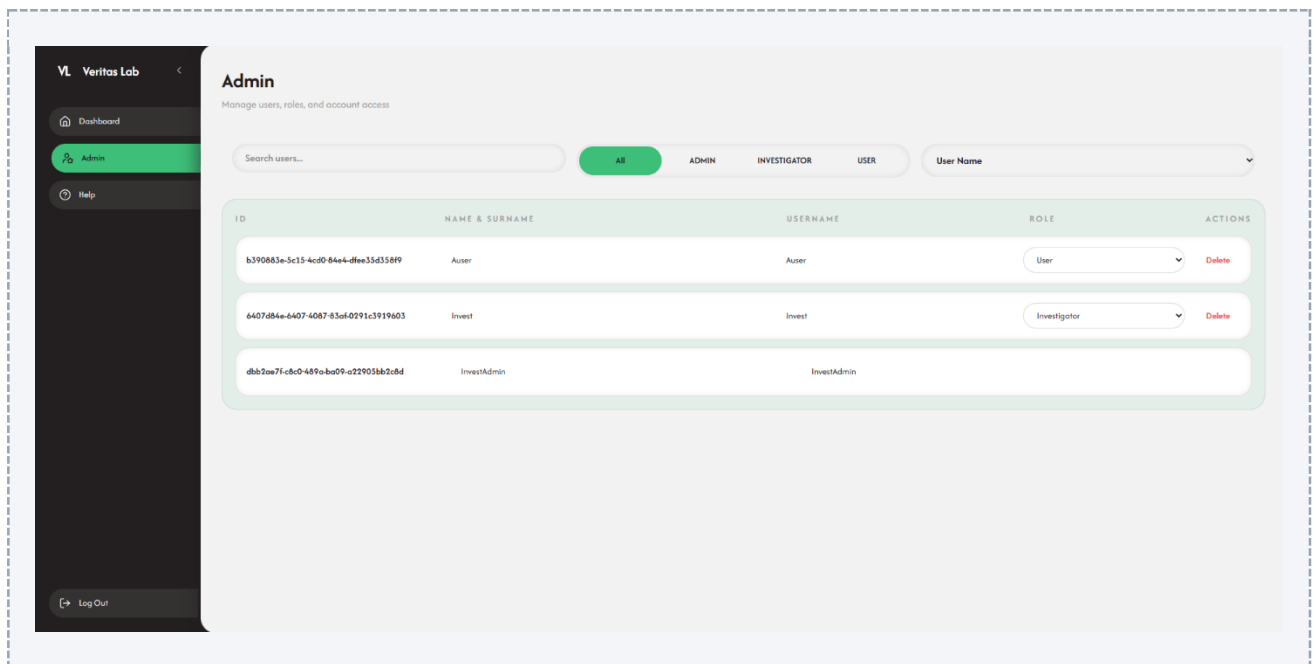

Figure 18 - The Admin page for managing user accounts

9.2 Each user card

Every account appears on its own row showing, from left to right: the user ID, their display name, their username, a dropdown to change their role, and a red Delete button.

Changing someone's role

1. Find the person in the list.
2. Open the dropdown on their row and choose Admin, Investigator or User.
3. The change is applied immediately. The controls are briefly disabled while it saves.

Removing an account

4. Click the red Delete button on that person's row.
5. A confirmation box appears naming the account so you can double-check you have the right one.
6. Confirm to remove the account or close the box to cancel.

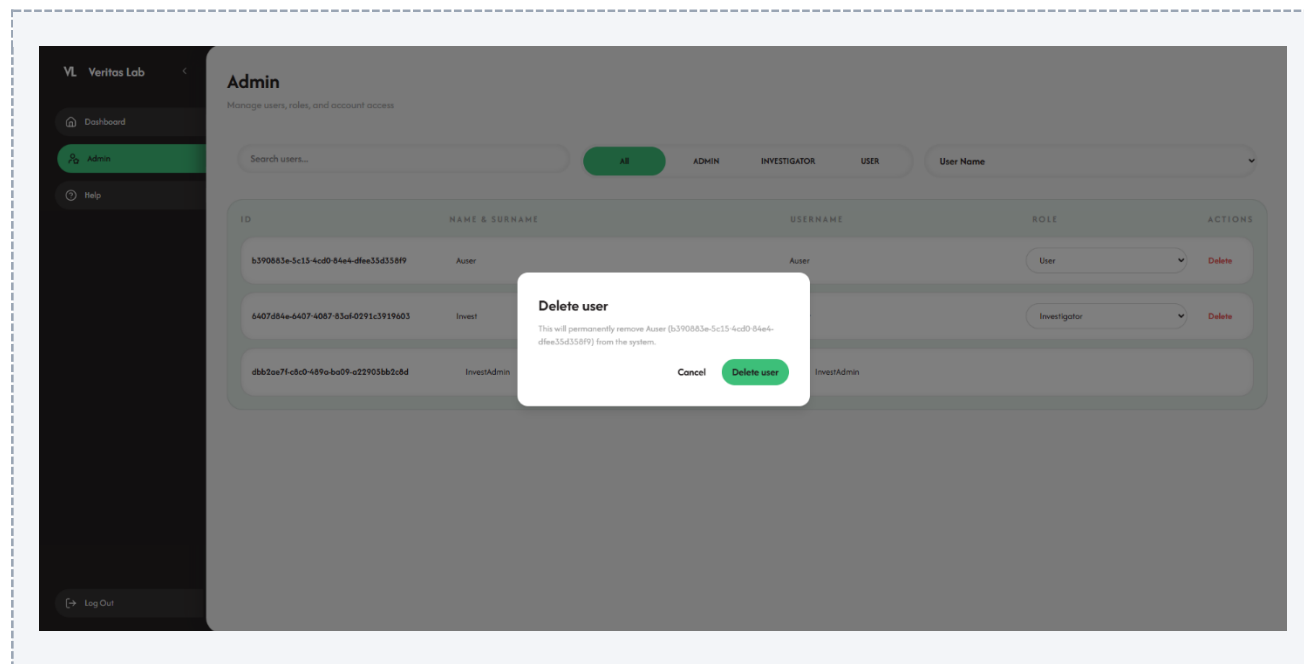

Figure 19 - The confirmation shown before an account is removed

If something goes wrong, a red message appears below the list explaining what failed. If no accounts match your search you will see "No users found."

10. The Help page

Address: /help · **Sidebar:** Help

The Help page is a built-in reference you can reach from anywhere. It consists of Tutorials, guides and answers for working with Veritas Lab.

10.1 Searching

A wide search box sits under the heading. Type a word - for example "annotation" or "password" - and every section is filtered at once. A small number appears on each tab telling you how many matches it holds, so you can see immediately where the answer lives.

If nothing matches, the page says, "No results for ..." and suggests trying another term or another section.

10.2 The three sections

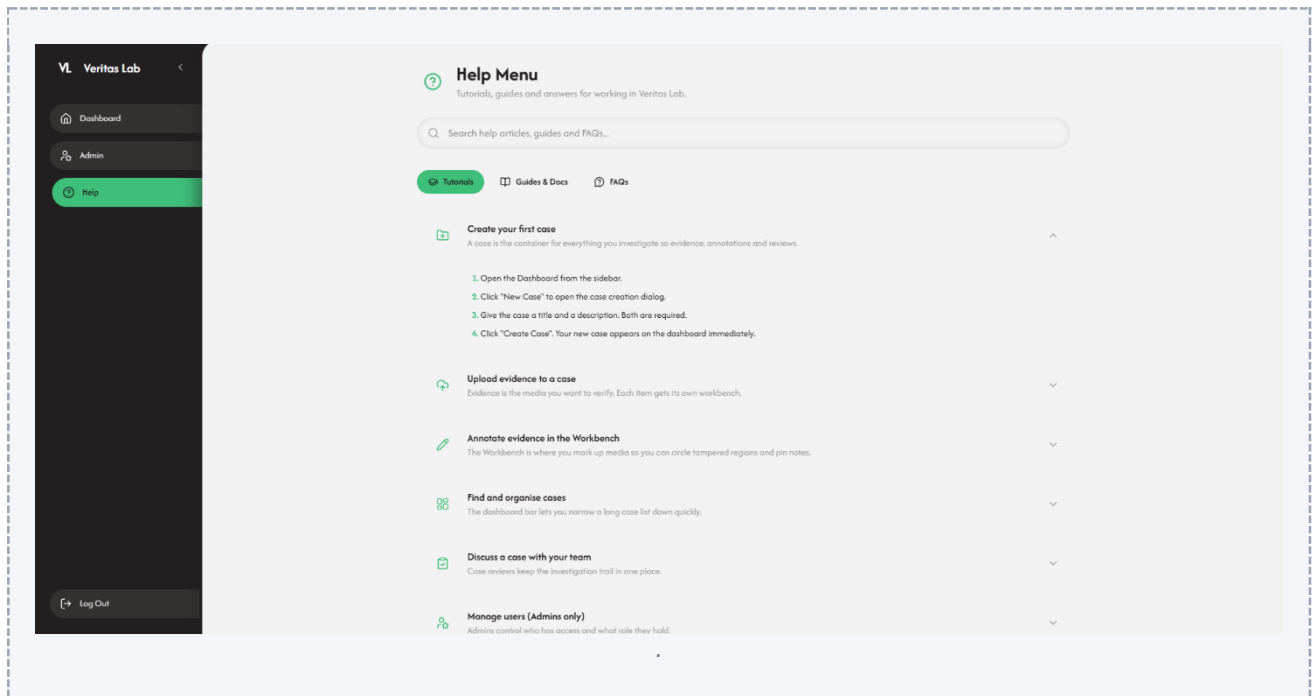

Figure 20 - The Help page showing an expanded tutorial

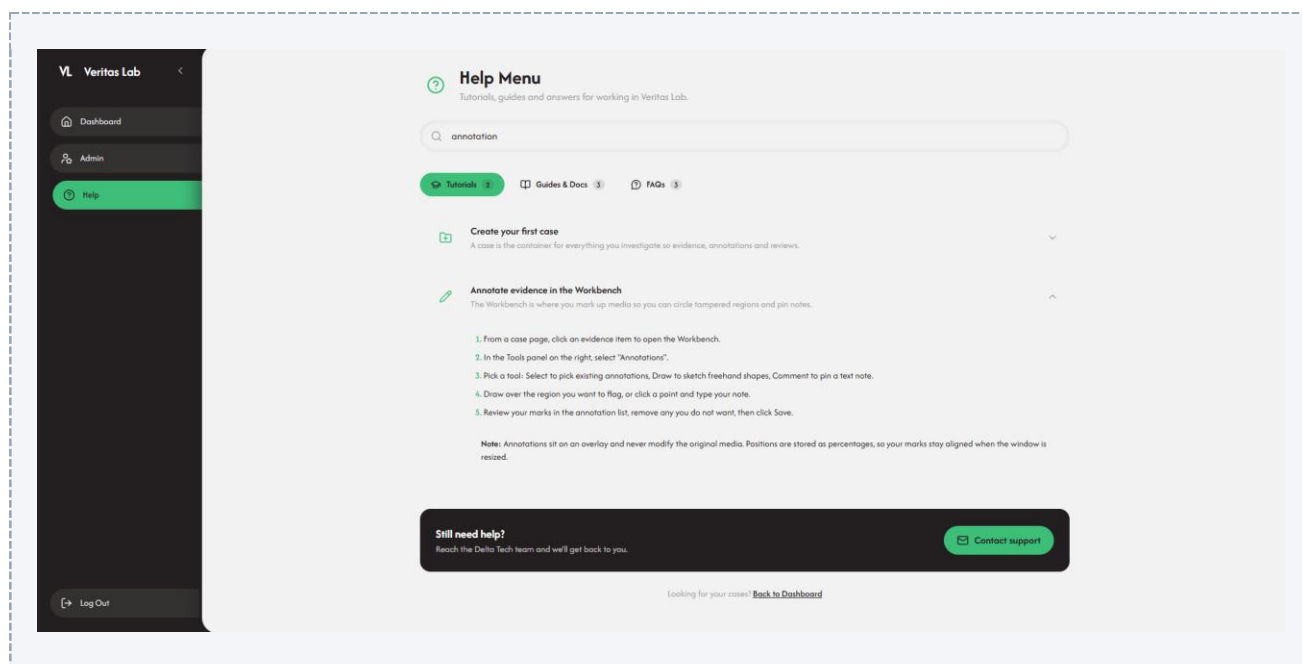

Figure 21 - Searching the help content

10.3 Still stuck

At the bottom of the page panel headed "Still need help?" contains a Contact support button. Clicking it opens a new email to the Delta Tech team at support.deltatech@gmail.com.

Below that, a link labelled "Back to Dashboard" returns you to your cases.
