8. Changelog from Demo 1

1. Refined Colour Palette

PRIMARY

#231F20

--color-primary

SECONDARY

#3DBF79

--color-secondary

BACKGROUND

#FFFFFF

--color-background

LIGHT

#A1A1A1

--color-light

LIGHTEST

#F2F2F2

--color-lightest

ERROR

#EF4444

--color-error

WARNING

#D97706

--color-warning

RISK

#E0A92E

--color-risk

INFO

#2B6CB0

--color-info

SUCCESS

#2A9A5E

--color-success

Colour	Usage
Primary	Sidebar background, headings & body text on white surfaces, modal/card text.
Secondary	Active nav pill, primary/confirm buttons, input focus border.
Background	Card and form backgrounds, text on dark/green surfaces.
Light	Secondary/placeholder text, default input borders, card descriptions.
Lightest	Main content-area background behind the sidebar layout.
Error	Destructive actions, confirmed manipulation results.
Warning	Inconclusive results, cautionary states.
Risk	Risk signal, flags elevated-risk cases for review.
Info	Informational messages, processing status.
Success	Confirmed-authentic results, successful actions.

WCAG 2.2 contrast reference

Foreground	Background	Ratio	Passes for
#231F20	#FFFFFF	17.5:1	All text, AAA
#FFFFFF	#231F20	17.5:1	All text, AAA
#231F20	#A1A1A1	4.7:1	Normal text, AA
#FFFFFF	#3DBF79	2.8:1	Large bold text only
#A1A1A1	#FFFFFF	2.4:1	Decorative / placeholder only

2. Typography System

Two font families power the interface.

Body / display, Afacad

Discover the future of digital forensics

Regular interface text at medium weight.

Caption / secondary text, 12 to 14px.

Monospace, Geist Mono

case_ref: VL-2026-00417

sha256: 8f14e45fcee167a5a36dedd4bea2543

3. Logo & Iconography

Two mark variants: one for light backgrounds (`VL_Logo.svg`), one for dark backgrounds (`VL_Logo_light.svg`).

Icon library, Lucide React

Home, Help, Admin, Log out, Collapse, Expand, Search, Contact.

4. Design Tokens

The colour, font, radius and shadow values used consistently across the interface.

```
--color-primary: #231F20;
--color-secondary: #3DBF79;
--color-background: #ffffff;
--color-text: #231F20;
--color-dark: #231F20;
--color-light: #a1a1a1;
--color-lightest: #F2F2F2;
--color-error: #ef4444;
--color-warning: #d97706;
--color-info: #2b6cb0;
--color-success: #2a9a5e;
--color-risk: #e0a92e;

--font-sans: Afacad;
--font-mono: Geist Mono;
```

Radius

Name	Value	Usage
Pill	rounded-full	Buttons, inputs, nav pills, search bars.
Card, small	14px	Evidence thumbnail frame.
Card	21px	Evidence cards, dashboard cards, workbench panel.
Card, large	24px	Admin panels, review composer, review thread.
Card, extra large	28px	Case reviews panel, empty states.

Shadow

Name	Value	Usage
Panel	inset 0 0 8px rgba(0,0,0,0.1)	Search bars, evidence cards, review panels, sliders, filter pickers.
Panel, subtle	inset 0 0 8px rgba(0,0,0,0.06)	Admin user rows.

5. Component Library

Buttons

Form input

Pill-shaped text input with hover, focus and disabled states, default border colour `--color-light` , focus border `--color-secondary` .

Modal

White card on a dark overlay, header, body and confirm/cancel actions styled with the Submit and Sad Sack button variants.

Cards

Case card (title, description, status pill) and Evidence card (media name, preview, extension) both use the card radius and panel shadow tokens.

Sidebar

Dark panel (`--color-primary`), active nav item shown as a green pill (`--color-secondary`) with dark text, inactive items in white text.

6. Accessibility Standards

Conformance target: WCAG 2.2 AA.

- Visible keyboard focus ring on card and link elements.
- `aria-label` / `aria-hidden` on login/register forms, landing page and annotation UI.
- `prefers-reduced-motion` respected for scroll behaviour and page reveal animation.

7. Voice & Tone

- **Plain language over jargon.** Status and error copy should say what happened and, where relevant, what to do next, not internal codes or exceptions.
- **Concise labels.** Buttons and nav items use short, action-oriented text ("Log In", "Sign Up", "Log Out").
- **Neutral, professional tone.** Consistent with an analyst tool, no casual phrasing or exclamation marks in system copy.

8. Changelog from Demo 1

Demo 2 development prioritised shipping five fully-integrated core use cases alongside continued design-system work. This table tracks what changed and why.

Area	Demo 1	Demo 2 (current)
Colour palette	4 colours (Black, White, Green, Grey #C3C3C3) plus 4 semantic colours	Grey changed to #A1A1A1, #F2F2F2 added as content background, and Warning, Info, Success and Risk tokens formalised.
Typography, monospace	JetBrains Mono for machine-generated values	Geist Mono loaded instead, not yet applied to any specific content type.
Typography, scale	Named modular scale (Display, H1-H4, Body, Caption)	No scale implemented, sizes set ad hoc per screen.
Status badges	4-state badge system with colour and aria-label per result	Not implemented, case status renders as a single green pill regardless of value.
Buttons	8 required states incl. danger, loading, focused, disabled	2 states implemented per variant (default, hover), destructive delete action uses the green variant.
Modal	Focus-trapped, 560px/80vh, black header, destructive dialogs immune to overlay-click	No focus trap, max-w-md, no header convention, overlay click always closes.
Design principles	Glassmorphism explicitly deferred	Backdrop-blur and glow effects added to landing, login and register pages.
Design tokens	Spacing, radius and shadow implied via 4px-multiple rule	No formal tokens, ad hoc utility values and a repeated inline shadow pattern.
Logo	Full lockup (circle, green divider, wordmark) with clear-space rule	Circle mark placed next to plain text, no divider, no enforced clear space.
Sidebar	User avatar and name at footer	Footer contains only a Log Out button.
Accessibility	Green focus ring, focus trap, aria-live, full ARIA coverage	Black focus ring on some components, no focus trap, no aria-live, partial ARIA coverage.
